2. Library/Multi-purpose building
3. Latrines
4. Fundraising

Introduction

The objective of this newsletter is to provide information about the activities executed since our visit to Yawsae in November 2010. During this visit we have seen that the newly build classrooms were fully operational and have confirmed the future requirements to improve education, general well being and health with the chief of the community, the headmaster and our local project manager. We have also visited the local education authorities to inform them about the progress of our projects and future plans. As a result of a meeting with the teachers we have purchased teaching and learning materials and toys.

1. Well

Near Yawsae is a well, which is being used by 7 hamlets. This well was polluted and therefore we have renovated and repaired it in order to enable the inhabitants to use it again. Our project manager will facilitate the maintenance and the purification of the water. Every 3 months the water will be disinfected with tablets. By means of a jerry can the water will be collected.

The renovation and repair of the well is paid by a part of the donation of [Avio-Diepen](#). In total €1.500 has been spend on materials, a pulley, transport and local labour. The maintenance and purification of the water will be paid out of our fixed donations.

2. Library /Multi-purpose building

After consultation of the teachers, the chief and the head master (mr Ananse) a request for a library / multi-purpose building was formulated. This building of 5 by 4 meters is build against the existing school blocks. The purpose of this building is to have a place where children can do their homework, where the parents and teachers can meet and where the community can get together.

4. Fundraising

The library will get books and furniture. Final construction activities need to be performed. Our local project manager Emmanuel has supervised the construction.

This project has been paid out the donations of [Avio-Diepen](#). €7.000 has been spend on stones, wood, roofpanels, transport and local labour.

The maintenance activities will be co-ordinated by our project manager using funds made available by our fixed donors.

3 . Latrines

The community of Yawsae has indicated that the latrines needed to be renewed. At this moment we are building new latrines. A substantial gully has been digged, on top of which a construction of concrete and masonry will be build.

This project will be partly paid out of the proceeds from a [fundraising activity](#) organised by the children of primary school de [Meulenridders](#). The missing part will be paid out of funds made available by our other donors.

4. Fundraising

In case you would like to organize a fundraising event for Yawsae, please contact [us](#) and we will support you. We also would like to refer to our [website](#).
